THE Philadelphia Engineering Com pany wiii in a few days ship overland to San Francisco and thence to Japan an immense steel plate smokestack, to equip a large new electric light plant in Yokohama. The stack is a huge affair, being 175 feet high and 7 feet 3 inches in diameter in the clear weighing over 90,000 pounds. There are few larger steel stacks in this country than the one for the Japanese The contract for the stack was awarded by S. N. A LONDON Judge has ruled that where a worshiper by mistake puts a iarger amount than intended into th Church collections box, the money be comes the Lord's and cannot be re funded on a plea of error. The decision grew out of a cuit brought by a woman who attends service in the fashionable Episcopai Church at Regents Park, against the Vicar and Church Wardens, her contention being that, during a fit of mental aberration she had placed in the plate a gold severeign (\$5) instead of a silver shill ing, (25 cents.) She therefore sought to recover some \$4 75. The Court held that the moment the money feli into the plate it became an accepted offering to the LORD, and that neither the Church officials nor the Courts were at liberty to authorize its return to the donor. This is said to be the first case and decision of the kind on record, and may stand as a precedent for many generations to come
